

The average interest rates in the data marts are based essentially on the contract information delivered. The data marts also contain all the information needed to differentiate between financial products and counterparties:

- Fixed interest rate or effective interest rate
- Fixed interest period
- Private individual or company
- Type of loan (consumer, residential construction, overdraft or corporate loan) as well as
- Information on periods of notice

Customer Data Mart: Fixed interest rate | Posting Date: Dec 31, 2012 | Report: AVG (Interest rate)
